The partial identification is arrived at in his opinion through the findings of the coroner, which an acquaintance of Carey positively identified.

PROGRESS AT SANATORIUM

Administration and East Ward Buildings Nearly Completed—

Pushing Work on West Ward Building—Expect to be Ready for First Tuberculous Patients November First.

The new tuberculosis sanatorium buildings on the old Post place at Trading Cove are rapidly nearing completion, the exterior of the administration building and the east ward building practically finished, while the carpenters are hustling the work on the west ward building.

On this building, which is located to the south and west of the other buildings, work was not started until the other two were well along in construction. Just now the carpenters are finishing the floors and roof. The north end already shined. The east ward building is ready for the doors and windows, being practically completed on the exterior.

The main building or administration building, located between the two wards, is very nearly completed. On Monday the masonry and brick work were being given a cement finish and the carpenters were at work on the roofing. A sprinkler system has been installed.

The buildings are long and low and present an attractive appearance. On the outside they are finished in shingles, and the chimneys, which extend from the ground to the roof on the outside of the buildings are finished in rough cement, an attractive feature.
